Certificate in Emerging Digital Technologies

Embrace tomorrow's tech, today

In recent years, technology has emerged as one of the most critical factors in the success, and failure, of any business. These emerging technologies, although empowering, can be a disruptive force, impacting industries and markets in multiple, unforeseen ways.

Many business owners, managers, and decision-makers struggle to identify the right technologies to positively impact their business and drive the bottom line. Those who aim to stay ahead of the curve and capitalise on market opportunities must be able to comprehend emerging technologies and their true business and societal impact.

Through our 12-week online Certificate in Emerging Digital Technologies, you will gain a deep understanding of technologies such as artificial intelligence, cybersecurity, IoT, blockchain, fintech, robotics, and virtual/augmented/mixed reality, and how they can be utilised to create opportunities within your industry.

Now is the time to prepare for the future. Equip yourself with the skills to make better informed business decisions, while also strengthening your career prospects.

National College of Ireland

Who is this programme for

This course is targeted at IT and non-computing professionals who wish to understand the latest emerging digital technologies and how to integrate them into their workplace.

Programme delivery

The course is fully online and runs for a 12-week semester. The programme is delivered via synchronous and asynchronous directed activities, using state-of-the-art technologies and teaching techniques to support the virtual classroom.

Live online lectures will be scheduled 2x evenings per week, with 2x hours per lecture. The classes are recorded and made available, but attendance is strongly advised as class engagement and group work is a key aspect of this course.

There will be an additional 2x hours of non-scheduled self-paced directed e-Learning, consisting of short videos, recommended reading, and tutorial exercises. Students are encouraged to engage with this content each week before their live class to build an understanding and to prompt questions.

Module breakdown

Module 1	Digital Business Transformation
<ul style="list-style-type: none"> Investigate methodologies to assess the impact of market and societal forces salient to digital business transformation. Identify core principles, frameworks and tools for digital business transformation that make use of emerging technologies to support stakeholders. Specify, analyse, design and implement a solution that makes use of emerging digital technologies and the theory of digital business transformation for a practical business case study. Explain and justify the use and application of emerging digital technologies for a project. 	
<p>Assessment for Module 1 – Digital Business Transformation is based on 100% continuous individual assessment, consisting of two assignment submissions and covering the complete module curriculum.</p>	

Module 2	Emerging Digital Technologies
<ul style="list-style-type: none"> Understand the significant role of emerging digital technologies and their relevance to contemporary business practice. Discriminate between relevant emerging digital technologies and distinguish their key definitions and components. Assess and analyse the impact of emerging digital technologies across a variety of industries. Evaluate industry-agnostic approaches and methodologies for integrating emerging digital technologies to innovate, automate and/or simplify business practice. 	
<p>Assessment for Module 2 – Emerging Digital Technologies is based on a 100% group project, consisting of two submission parts during the semester and will cover the complete module curriculum.</p>	

Outcomes for you

Upon completion of this programme, you will have acquired a comprehensive set of skills and knowledge that will enable you to perform various roles and tasks within your industry.

You will be able to:

Utilise core knowledge and understanding of emerging digital technologies and digital business transformation that can be readily utilised in business contexts.

Generate insights using industry-agnostic frameworks, tools and methodologies for a variety of emerging technologies and make use of this information to solve real world business problems.

Analyse, design, implement and document a digital business transformation solution that applies emerging digital technologies for a specific business domain case study to enhance the business performance.

Demonstrate enhanced communication, presentation, teamwork and problem-solving skills.

Award

Participants will receive a parchment for the Certificate in Emerging Digital Technologies awarded by National College of Ireland upon successful completion of the programme.

I chose the programme because I work in the business improvement field, helping companies on their digital transformation journey. In recent years, we've seen how new technologies help businesses improve their processes and efficiencies and I was interested in looking at emerging digital technologies before they became mainstream. The digital transformation section of the course was particularly useful as we are very active in that field. My training and experiences in lean management, digital transformation, and lean processes went hand-in-hand with the coursework.

John O'Shanahan,
Business Owner, LeanBPI

Academic eligibility

A minimum of a Level 6 qualification on the NFQ (National Framework of Qualifications) is required for standard entry.

For candidates who do not meet this minimum entry requirement, the college operates a Recognition of Prior Experiential Learning (RPEL) scheme whereby applicants may be considered based on relevant work or other experiences.

For applicants whose first language is not English, please note the English language entry requirements.

Funding eligibility

The fees for this programme are part-funded by Technology Ireland ICT Skillnet. The reduced programme fee is €1,299.

Applicants must be working in a private or commercial semi-state organisation registered in the Republic of Ireland (Business, Consultant, Freelancer) to avail of the grant-aided fees. As a government-funded training network, we can only support those meeting these criteria.

Applicants who do not meet our funding criteria may in some cases be able to apply directly to the college and pay the full course fee of €1,700 if there are available places.

Please speak with our programme team to learn more about the availability of funding.
