

Certificate in Foundations of Artificial Intelligence

ONLINE • PART-TIME • NFQ LEVEL 8

Unleash your unstoppable potential, with Technology Ireland ICT Skillnet

Technology is ever-changing. No matter what stage you are at in business or your career, there is always more to learn.

At Technology Ireland ICT Skillnet, our vision is to create **progressive futures**, helping organisations to **transform at scale** and individuals to **develop a competitive edge**, through the **power of learning**.

For almost two decades, Ireland's leading technology companies have trusted us to build the critical skills needed to thrive in a rapidly evolving market.

Let us connect you to the infinite possibilities shaping the world of tomorrow.

Supercharged skills

Each of our programmes are designed, developed, and validated by specialists from academia and industry, working together, with a constant focus on:

1 **Creating opportunity and momentum** for experienced professionals and those starting out or transitioning career.

2 Delivering learning solutions in a way that **balances work and study**.

3 Providing practical skills, along with the theoretical, allowing businesses to **navigate new frontiers in the world of tech**.

Certificate in Foundations of Artificial Intelligence

Your AI journey starts here.

Ready to begin?

In today's business landscape, the integration of artificial intelligence (AI) has become imperative for sustained success. Almost all industries are witnessing a transformative shift towards AI-driven solutions, redefining operational paradigms and enhancing productivity. The demand for proficient AI practitioners is only on the rise.

○ ○ ○

○ ○ ○

○ ○ ○

This presents a crucial challenge to modern professionals to be able to comprehend the fundamental tenets of AI and identify the most appropriate applications for their business needs, to optimise business processes, build greater efficiencies and improve overall performance.

Working in partnership with TU Dublin, Krisolis, and the Women in AI Ireland Chapter, we have developed the award-winning Online Certificate in Foundations of Artificial Intelligence (Level 8 NFQ) as a direct response to this challenge.

AI can enhance operational efficiency, and those who are knowledgeable in this area can identify opportunities to streamline processes and increase productivity. The course provides a comprehensive curriculum designed by industry experts, helping you to acquire a competitive edge in harnessing AI's potential for your business.

Join our Online Certificate in the Foundations of Artificial Intelligence and embark on a transformative journey towards becoming an adept AI professional.

Winner of 'Digital Skills Initiative of the Year' at the 2024 Public Sector Digital Transformation Awards.

Women in AI Ireland Chapter

Course delivery

The course will run over 12 weeks, on Tuesday and Thursday evenings from 6.30pm to 9.00pm as a live classroom event. The course material will include video recordings as well as readings, exercises, and assignments.

This course provides one-to-one mentoring to guarantee that you derive maximum benefits from your learning journey. You will have the chance to receive guidance from a knowledgeable mentor who will assist you during the course.

Course partner Krisolis will be responsible for the delivery of the programme, including classes, mentoring and marking of final assessments.

Organisational decision-makers, like business leaders and middle management, all need basic AI knowledge and skills, to understand proposals for initiatives made by AI professionals and to understand the impact of AI on business processes.

Who is this course for

This course is uniquely designed for anyone who wants to understand the foundations of artificial intelligence and its respective technologies. Applicants may be from IT or non-computing backgrounds.

- ▶ **Professionals looking to enhance their current roles** through AI upskilling.
- ▶ **Leaders striving to acquire the skills** necessary for effective team management and communication in AI contexts.
- ▶ **Individuals contemplating a transition** into AI roles or higher education.
- ▶ **Recent graduates** from different fields interested in integrating AI knowledge to complement their expertise.
- ▶ **Returnees to the workforce** after a career break, aiming to acquire up-to-date AI skills.

Course content breakdown

Content for the Certificate in Foundations of Artificial Intelligence is delivered across the following classes:

Introduction to Artificial Intelligence

We'll explore what AI is, its component parts, applications, and use cases.

The Mathematical Foundations of AI

This section will introduce the underlying mathematical foundations that underpin decision making and Artificial Intelligence.

Using an Agile Framework and Designing and Architecting AI Solutions

Following an overview of the CRISP-DM and Agile methodologies, we will explore how these methodologies can be leveraged to create an Agile Framework for running AI projects.

Ethical Practice in Artificial Intelligence, Data Science and Analytics

We will examine the social, legal, and ethical issues relevant to the design and development of Artificial Intelligence solutions.

AI Tools and Ecosystems

In AI things are always changing. We'll look at some of the current and emerging AI toolsets and ecosystems.

Data Visualisation

We'll cover the fundamentals of data visualisation needed to create compelling visualisations from data, along with the practical skills to do this.

Programming with Python

The Python language is one of the most powerful and flexible tools in the AI toolkit. This section introduces Python programming and how to use it to perform data manipulation and data analysis tasks.

Capstone Project

Students have the option to select their capstone project from a group of sample projects or create their own on any subject.

The capstone project topic will be determined by the student halfway through the course. Mentoring sessions will be arranged to aid in project development. The project, along with personal reflections, will be completed and submitted at the end of the course.

Outcomes for you

This course serves as a stepping stone to further education and career progression. At the end of this 12-week course, you will have gained a thorough understanding of the foundations of artificial intelligence and be ready to further your AI journey.

You will be able to:

Describe what artificial intelligence is and outline the component parts of the domain.

Design and validate use cases for applying artificial intelligence to create effective solutions.

Curate, organise and analyse data for artificial intelligence projects.

Develop a deeper understanding of artificial intelligence through research and the documentation of AI findings

Explain the importance and considerations of ethics and social justice in designing and developing artificial intelligence solutions

Award

Participants will receive a parchment for the CPD Certificate in Foundations of Artificial Intelligence awarded by TU Dublin upon successful completion of the programme.

Assessment

Assessment of learning achievement will be through a mix of

On-line examination

Class assignments

Personal learning journal

Capstone project

Academic eligibility

Applicants need to possess a Level 8 (NFQ) Primary Degree, ideally but not necessarily, in a cognitive discipline and will be expected to have an appreciable level of quantitative aptitude. Applicants with relevant IT-work experience and IT-oriented Level-7 qualifications can apply to be considered for application. These applications will be assessed on a case-by-case basis.

For candidates who do not meet this minimum entry requirement, TU Dublin operates a [Recognition of Prior Experiential Learning \(RPEL\)](#) scheme whereby applicants may be considered based on relevant work or other experiences. Please note TU Dublin is the sole arbitrator on who is accepted on the course. Technology Ireland ICT Skillnet only assesses your eligibility for funding.

For applicants whose first language is not English, please note the [English language entry requirements](#).

Funding eligibility

The fees for this programme are part-funded by Technology Ireland ICT Skillnet. Please enquire for the 2025 subsidised course fees

Applicants must be working in a private or commercial semi-state organisation registered in the Republic of Ireland (Business, Consultant, Freelancer) to avail of the grant-aided fees. As a government-funded training network, we can only support those meeting these criteria.

Applicants who do not meet our funding criteria may be able to apply directly to the trainer and pay the full course fee, if there are available places.

Please speak with our programme team to learn more about the availability of funding.

Before taking this course, I took some other online courses, and this is definitely not like that. You're not going to sit in front of your computer or laptop watching a video. No, in this case there will be live interaction, there will be one-on-one mentoring sessions, there will be assignments, workshops and teamwork. All of this in particular was important for me. You will get the high standards that you would expect from higher education.

Jocelyn Castro-Catalan

Course delivered in partnership with:

TU Dublin is Ireland's 1st Technological University. As such, its education programmes concentrate on the real-world practice of technology. TU Dublin's Faculty of Computing, Digital and Data is a leading provider of high-level ICT programmes in a wide range of technology areas, including software engineering, data science, cybersecurity, artificial intelligence, and machine learning.

Krisolis is a leading consultancy firm specialising in data analytics and artificial intelligence solutions. With a strong focus on innovation and a deep understanding of cutting-edge technologies, Krisolis empowers organisations to harness the full potential of their data. Their team of experts combines extensive industry experience with a passion for driving actionable insights and strategic value.

The Women in AI Ireland Chapter is a vibrant community dedicated to promoting gender diversity and inclusivity within the field of Artificial Intelligence (AI). Composed of passionate professionals and enthusiasts, the chapter actively supports and empowers women in various AI-related disciplines.

Ready to develop your career in Artificial Intelligence?

Our team is ready to answer any questions you might have regarding this course. Send an email to info@ictskillnet.ie or use the enquiry form on our course page and one of our programme leads will be delighted to assist you.

Successful applicants will be required to complete registration details both for Technology Ireland ICT Skillnet and for TU Dublin. Course participants will become registered students of TU Dublin.
