

# MSc in Cybersecurity

BLENDED ONLINE • PART-TIME • NFQ LEVEL 9

# Unleash your unstoppable potential, with Technology Ireland ICT Skillnet

Technology is ever-changing. No matter what stage you are at in business or your career, there is always more to learn.

At Technology Ireland ICT Skillnet, our vision is to create **progressive futures**, helping organisations to **transform at scale** and individuals to **develop a competitive edge**, through the **power of learning**.

For almost two decades, Ireland's leading technology companies have trusted us to build the critical skills needed to thrive in a rapidly evolving market.

Let us connect you to the infinite possibilities shaping the world of tomorrow.

## Supercharged skills

Each of our programmes are designed, developed, and validated by specialists from academia and industry, working together, with a constant focus on:

**1** **Creating opportunity and momentum** for experienced professionals and those starting out or transitioning career.

**2** Delivering learning solutions in a way that **balances work and study**.

**3** Providing practical skills, along with the theoretical, allowing businesses to **navigate new frontiers in the world of tech**.

# MSc in Cybersecurity

## Master the art of cyber resilience

In today's technology-driven era, the surge in cyber attacks and data breaches has left businesses grappling with unprecedented exposure and risk.

**The digital realm has become both a playground and a battleground, and cybersecurity professionals are the guardians of this new frontier. The protection of data and digital assets has never been more critical, but the heightened demand for skilled professionals has resulted in shortages of cybersecurity specialists, across multiple industries.**

For ICT professionals interested in pursuing a career in cybersecurity or for those looking to enhance their existing cybersecurity capabilities, this 2-year blended online part-time Level 9 Masters programme is specifically designed to teach real-world practical skills that organisations demand, as you advance in this evolving field.

Whether you're a cybersecurity analyst, network security specialist, or an IT professional looking to specialise, the MSc in Cybersecurity will go beyond the basics. Take the next step in your cybersecurity journey with us, and redefine the future of digital security.

# At a glance

## Start Date

January 2026

## Award

Level 9 NFQ (90 ECTS)

## Delivery

Blended online – live lectures, video recordings and reading materials (via Moodle).

Bootcamp will only be scheduled in Semester 1 of this programme and will be delivered online.

## Duration

2 years part-time

## Fees

Skillnet subsidised: €3,150 per year

Non-subsidised: €3,875 per year

## Programme Partner

National College of Ireland

## What will you learn

The course is technical and practical in nature, uniquely created in collaboration with industry, and develops in-depth expertise of core technology and techniques. **Upon completion of this programme, you will be able to:**

- ▶ Analyse, identify, and document measures to address security vulnerabilities, risks, and weaknesses.
- ▶ Critically assess and evaluate ethical, legal, privacy, sustainable, and governance issues associated with developing secure applications and services.
- ▶ Make decisions and address security requirements through analytical thinking, communication, and interaction.
- ▶ Apply advanced security knowledge and utilise practical skills and technologies to design and implement cybersecurity solutions.
- ▶ Communicate complex and advanced cybersecurity concepts to a range of audiences.
- ▶ Conduct independent research in the cybersecurity area and formulate and implement novel ideas.

## Who is this programme for

- ▶ ICT professionals who want to develop their career within cybersecurity.
- ▶ Cybersecurity professionals who want to gain a recognised qualification.
- ▶ Those aspiring to take a leading technical or managerial role within their organisation.
- ▶ Graduates in related fields who are looking to progress into the emerging area of cybersecurity.

# Semester and module breakdown

## Semester 1

Jan – May  
Year 1

- Security Fundamentals
- Data Governance, Ethics, and Sustainability
- Forensics and eDiscovery (S1)
- Secure Web Development (S2)

## Semester 2

Sept – Jan  
Year 1

- Network Security and Penetration Testing
- Cryptography and Blockchain
- Malware Analysis (S1)
- Secure Application Development (S2)

## Semester 3

Jan – May  
Year 2

- Cloud Architectures and Security
- AI/ML in Cybersecurity
- Business Resilience and Incident Management

## Research Project (Capstone)

May – Jan  
Year 2

- Research Elective
- Practicum Part 1 & Part 2 OR/
  - Internship Part 1 & Part 2

Learners will be asked to elect one of the two specialisations:

- Investigation specialisation (Semester 1)
- Secure Development specialisation (Semester 2)

Specialisations will run subject to a minimum number of learners. Learners will be asked by National College of Ireland to choose their specialisation before programme commencement.

# Outcomes for you

Cybersecurity roles have experienced a very fast growth rate in comparison to many other technology jobs in recent times. Additionally, many of the top global companies in this field are located in Ireland, such as McAfee, Symantec and CISCO.

Considering the high demand and the variety of roles within cybersecurity, graduates may explore careers in the following areas:

Information security analyst

Risk advisory on information security

Secure application developer

Forensics

Cybersecurity tester

Cloud security analyst

## Assessment

The programme will be assessed with a blend of:

Continuous assessments

Directed activities and pre-class prep work

Live online class attendance records

Project work and exams (proctored online)

## Award

Participants will receive a parchment for the Master of Science in Cybersecurity upon successful completion of the programme.

## Academic eligibility

Candidates must have an honours (NFQ level 8) primary degree in computing or a cognate area with a 2.2 award or higher. Cognate area means a STEM (Science, Technology, Engineering, and Mathematics) degree that also has taught programming / application development-related modules. Candidates are expected to have programming ability, which can be demonstrated through transcripts, recognised certifications, and/or relevant work experience. An assessment and/or interview may be conducted to ascertain suitability if necessary, for candidates who do not meet the normal academic requirements.

The college operates a Recognition of Prior Experiential Learning (RPEL) scheme meaning applicants who do not meet the standard academic requirements may be considered based on relevant work and other experiences. This may be assessed using a portfolio of learning, demonstration of work produced, and an interview. The programming ability of the applicant will also be assessed.

Non-native English speaking applicants must demonstrate fluency in the English language as outlined by IELTS, with an academic score of at least 6.0 or equivalent.

## Funding eligibility

The fees for this programme are part-funded by Technology Ireland ICT Skillnet. The reduced programme fees are €3,150 per year.

Applicants must be working in a private or commercial semi-state organisation registered in the Republic of Ireland (Business, Consultant, Freelancer) to avail of the grant-aided fees. As a government-funded training network, we can only support those meeting these criteria.

Applicants who do not meet our funding criteria may in some cases be able to apply and pay the full fee of €3,875 per year if there are available places.

Please speak with our programme team to learn more about the availability of funding.
